Daily Inspection

Daily – Inspection of X-904 prior to each use by *Qualified Person**

Satisfactory Non-Satisfactory

 *Check for any damage on all parts of the unit

Comments

 *Visually inspect safety load line when attaching the X-904 to the crane hook. This includes the 4-part sling and all hardware as well as the load line and fabric covered stabilizer. Look for crimps, broken wires or excessive wear or rust. If any of these problems exist, take the unit out of service immediately and replace the sling. Inspect crane hook positive locking device for function and physical condition.

Comments

 *Visually inspect all the load bearing areas of the X-904 for excessive wear or damage, paying close attention to the rigging lines (inner and outer).

Comments

 *Visually inspect the aluminum center section for damage, cracks, or excessive wear.

Comments

 *Inspect the stainless quick release clips. Regularly spray with a lubricant (i.e. WD-40) to protect from corrosion.

Comments

*****If any load bearing area of the X-904 is worn or defective in any way, take the unit out of service immediately.**

*****If the X-904 is to be used to transfer personnel in rough sea conditions, we recommend a JSA be completed before the lift is conducted.**

*****API definition of “Qualified Inspector” – A person so designated by the employer who by reason of a appropriate experience and training, in addition to meeting requirements of a qualified person, has attended formal training in inspection, maintenance, and troubleshooting of cranes, rigging, and lifting devices.**
